

## Scratch-Build the ME-262-V1

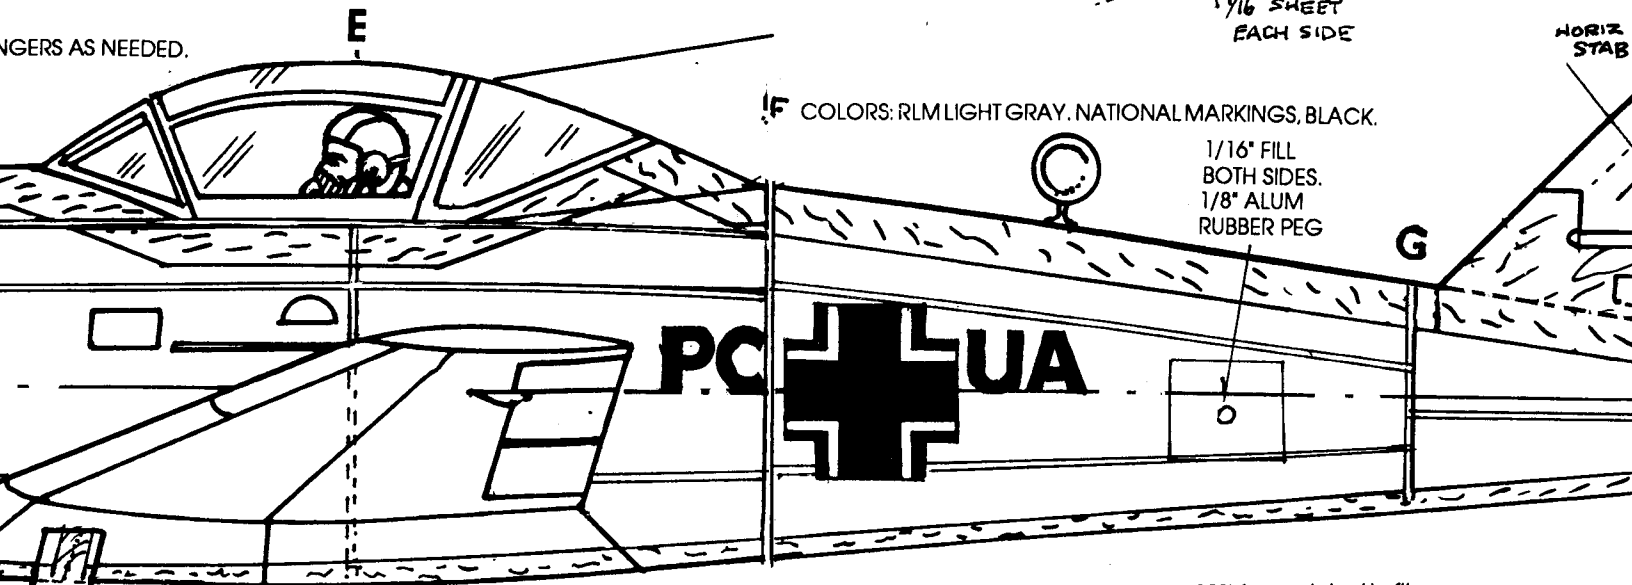

**1941 ME-262-V1**  
 piston power test for Jet ME-262-V2

*From reader E.J. "Sig Stigmon, these interesting drawings of the piston power test bed ME-262 V1, the forerunner to the twin jet Jumo powered ME-262 V2. We re-inked the drawings from Sig's penciled drawings. There is not much detail here, however, Sig built a successful flying model and we think you can also. So, scratch builders, go to it. You can write Sig at 5825 Lowell Rd., Everett, WA 98203.*

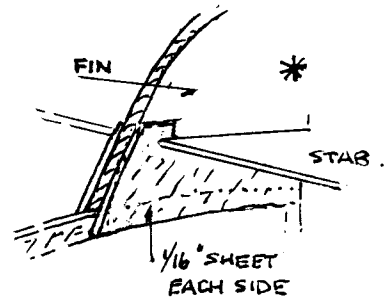

NGERS AS NEEDED.

F COLORS: RLM LIGHT GRAY, NATIONAL MARKINGS, BLACK.
